

# CURVE AND REDUCTION TABLES

Published by Eugene Dietzgen Co.

## CURVE FORMULAS

1. Radius :  $R = \frac{50}{\sin D/2}$
2. Degree of Curve:  $D = 100 \frac{I}{L}$ . Also,  $\sin D/2 = \frac{50}{R}$
3. Tangent :  $T = R \tan \frac{1}{2} I$ . Also,  $T = \frac{T_{\text{for } 1^\circ \text{ curve}}}{D} + C$ .
4. Length of Curve:  $L = 100 \frac{I}{D}$
5. Long Chord :  $L.C. = 2R \sin \frac{1}{2} I$ .
6. Middle Ordinate :  $M = R(1 - \cos \frac{1}{2} I)$
7. External :  $E = \frac{R}{\cos \frac{1}{2} I} - R$ . Also,  $E = T \tan \frac{1}{4} I$ .

## EXPLANATION AND USE OF TABLES

Given P.I. Sta. 83+40.7, I = 45° 20' and D = 6° 30': find:

**Stations**—P. C. = P. I. - T.  $T = \frac{T_{\text{for } 1^\circ \text{ curve}}}{D} + C$ . From Tables V and VI  $T = \frac{2392.8}{6.5} + 197 = 363.32 = 3 + 68.32$ . Sta. P. C. = 83+40.7 - (3+68.32) = 79+72.38. P. T. = P. C. + L, and L = 100  $\frac{I}{D} = 100 \frac{45.33}{6.5} = 697.38$ . Therefore, P. T. = (79+72.38) + (6+97.38) = 86+69.76.

**Offsets**—Tangent offsets vary (approximately) directly with D and with the square of the distance. From Table III Tangent Offset for 100 feet = 5.669 feet. Distance = 80 - Sta. P. C. = 27.62. Hence offset =  $5.66 \times \left(\frac{27.62}{100}\right)^2 = .432$  ft. Also, square of any distance, divided by twice the radius equals (approximately) the distance from tangent to curve. Thus  $(27.62)^2 / (2 \times 881.95) = .432$  ft.

**Deflections**—Deflection angle =  $\frac{1}{2} D$  for 100 ft.,  $\frac{1}{4} D$  for 50 ft., etc. For "X" ft, Deflection Angle (in minutes) =  $\frac{1}{3} \times X \times D$ . For Sta. 80 of above curve Deflection Angle =  $\frac{1}{3} \times 27.62 \times 6.5 = 53.86$ . Also Deflection Angle =  $dft$ , for 1 ft, from Table III  $\times X = 1.95 \times 27.62 = 53.86'$ . For Sta. 181 Deflection Angle =  $53.86' + \frac{6^\circ 30'}{2} = 4^\circ 8.86'$ .

**Externals**—From Table V for 1° curve, with central angle of 45° 20', E = 479.6. Therefore, for 6° 30' curve,  $E = \frac{479.6}{6.5} + \text{Correction from Table VI} = 7.378 + .039 = 7.417$ .
